# Introduction

In 2025, phishing is no longer a passing trend it has become the primary weapon in the cybercriminal's arsenal. Smarter techniques, more convincing messages, and highly targeted attacks are now designed to exploit employees before systems. It is low-cost for attackers, difficult to detect, and high-impact for both individuals and organizations.

Today, phishing is not a possibility... it is a daily, real-world threat.

Our response isn't reactive it's proactive.

Through realistic phishing attack simulations, we transform your employees from a potential weakness into your first line of defense, building genuine security awareness where most attacks begin: the inbox.

## 135+ AI-Powered Phishing Templates

Stay ahead of evolving threats with a rich library of 135+ realistic phishing templates, enhanced by artificial intelligence and continuously updated to reflect the latest real-world attack techniques.

Each template is designed to closely mimic modern phishing campaigns, enabling highly effective simulations that test employee awareness, uncover risk areas, and build lasting security habits before real attackers strike.

What you get:

- ✓ 135+ modern, ready-to-use phishing templates
- ✓ AI-enhanced realism and adaptive scenarios
- ✓ Regular updates aligned with current threat trends
- ✓ Built for enterprise-grade phishing simulations

# Conversational Phishing Powered By Generative AI

Phish Proof can conduct conversational phishing, replicating sophisticated phishing techniques, whereby attackers establish back-and-forth communication to build trust with their victims before delivering the phishing payload. This capability is powered by AI and uses Open Source Intelligence (OSINT) to make phishing conversations realistic and contextually accurate. Each interaction is unique and tailored to employees, leveraging its knowledge to stay credible when questioned. Conversational phishing is available over both email and voice calls.

Subject [Urgent] Expense Claim Discrepancy

Body Hey Mike,

I hope you're doing well! Do you have a moment to go over an expense claim discrepancy?

Best,  
Pamela

 Mike Kirby <mike@victim[.]com> 5 minutes ago

Subject Re: [Urgent] Expense Claim Discrepancy

Body Hi Pamela,

Yikes! My apologies in advance if I made a mistake. I'm available now. What do you need?

Thanks,  
Mike

 Pamela Turing <pamela[.]turing@ai-attacker[.]com> Received now

Subject Re: [Urgent] Expense Claim Discrepancy

Body Hey Mike,

Before I can go into the details, could you please provide your employment start date and your official job title. This is just a basic security measure we have in place to protect our employees' information.

Best,  
Pamela

## Gamified Learning with Compliance Certifications

Explore our ever-expanding library of free security awareness training videos, delivered through interactive micro-learning modules enhanced with gamification. Each lesson is designed to turn complex security concepts into simple, engaging, and actionable learning experiences. Every module includes short assessments to measure understanding. Upon completion, employees receive individual compliance certificates, helping organizations demonstrate security awareness, readiness, and regulatory compliance.

### Real impact :

- 8 minutes average module completion time
- 50 topics to build lasting security habits
- Short quizzes to validate knowledge
- Individual compliance certificates per employee

# Compliance and Standards

## Compliant Controls

Phish Proof enables your organization to meet both national and global compliance standards and controls with ease

 <p><b>NCA</b> Fundamental Cybersecurity Controls</p> <p>Phish Proof helps meet the National Cybersecurity Authority's requirements by boosting security awareness and simulating phishing attacks, ensuring compliance with ongoing training and awareness regulations.</p>	 <p><b>ISO 27001</b> Global Information Security Standards</p> <p>Phish Proof supports ISO 27001 compliance by offering employee awareness tools, risk-reduction procedures, and strategies to enhance your organization's internal security.</p>	 <p><b>SAMA</b> Saudi Central Bank Cybersecurity Framework</p> <p>Phish Proof ensures compliance with SAMA requirements by offering ongoing employee training and realistic phishing simulations to measure and enhance threat readiness and response.</p>	 <p><b>Aramco CCC</b> Aramco Information Security Controls</p> <p>Phish Proof supports CCC program requirements with tools for employee awareness and behavioral assessments, delivering actionable reports to help energy and industrial companies stay compliant with security regulations.</p>
---	--	---	--

## Additional Supported Frameworks

Phish Proof also supports compliance with additional frameworks, including PCI DSS, NIST Cybersecurity Framework, GDPR, and other industry-specific requirements.
